

For more than 60 years E-Z-GO® has been committed to continuous innovations on and off the golf course, and Pace Technology's innovative approach to the game of golf is improving the way golfers and club managers experience their courses. As a part of this commitment, Pace Technology is excited to announce a new partnership with the #1 app for golf, GolfLogix.

GolfLogix

PACE TECHNOLOGY SCREEN ENHANCEMENTS

The new partnership with GolfLogix has improved the Pace screen and elevated the player experience with a new approach view. Now when the golf carts are 150 yards from the green, a heat-mapped image of the green will pop up on the screen to show undulations, thus allowing players enhanced accuracy. Additionally, walkers using the app will now be visible on the Pace screens for golfers to avoid hitting shots into groups that are in blind spots on the course.

GOLFLOGIX IMPROVEMENTS TO THE COURSE EXPERIENCE

The #1 app for golf just got even better with the partnership with Pace Technology. Courses with GolfLogix users now receive:

- Real-time Tracking of GolfLogix Mobile User
- Food & Beverage Ordering
- Direct Messaging with Clubhouse
